Your progress. Our promise.
JuggerLoc and ToggleLoc Soft Tissue Fixation System

The JuggerLoc implant is a combination of our JuggerKnot® Soft Anchor and adjustable length ZipLoop™ technologies. These have been combined to form a knotless suspensory fixation device that utilizes a soft button. A 2.9 mm JuggerKnot Soft Anchor serves as the button and the ZipLoop Technology construct allows for the tendon or graft to be easily zipped into the tunnel for final fixation.

The JuggerLoc implant system features seven different implants, all of which come kitted with the necessary instrumentation or as stand-alone implants. For those surgeons who desire a titanium button, we have designed a new, lower profile, ToggleLoc Fixation Device that fits through a 2.9 mm hole.

This system provides surgeons:

- An all-suture or low profile titanium implant option
- A small 2.9 or 2.3 mm drill hole, depending upon surgeon’s implant choice
- The ability to cinch the graft to the bottom of a socket, or directly against bone, due to our knotless ZipLoop Technology
- Options for securing the tendon directly to the implant
- Complete kits containing all instruments needed to implant the anchor
- JuggerLoc anchor available on both inserter and beath pin options
### Table of Contents

- Indications/Contraindications ..................................................................................................................4
- JuggerLoc/ToggleLoc 2.9 mm Soft Tissue Fixation with Needles .................................................................6-7
- JuggerLoc/ToggleLoc 2.9 mm Soft Tissue Fixation without Needles..............................................................8-9
- JuggerLoc 2.9 mm Soft Tissue Fixation Unicortical ................................................................................10
- JuggerLoc 2.3 mm Soft Tissue Fixation Pull Through with and without Needles ........................................11-12
- JuggerLoc/ToggleLoc Soft Tissue Fixation System Additional Instrumentation ........................................13
- Ordering Information ..................................................................................................................................14
Indications:
The JuggerLoc and ToggleLoc 2.9 mm system devices are indicated for soft tissue to bone fixation for the following indications:

Shoulder
- Bankart lesion repair
- SLAP lesion repairs
- Acromio-clavicular repair
- Capsular shift / capsulolabral reconstruction
- Deltoid repair
- Rotator cuff tear repair
- Biceps Tenodesis

Elbow
- Ulnar or radial collateral ligament reconstruction
- Lateral epicondylitis repair
- Biceps tendon reattachment

Knee
- Extra-capsular repair: MCL, LCL, and posterior oblique ligament
- Iliotibial band tenodesis
- Patellar tendon repair
- VMO advancement
- Joint capsule closure

Foot and Ankle
- Medial / lateral repair and reconstruction
- Mid- and forefoot repair
- Hallux valgus reconstruction
- Metatarsal ligament/tendon repair or reconstruction
- Achilles tendon repair
Contraindications

- Infection.

- Patient conditions including blood supply limitations and insufficient quantity or quality of bone or soft tissue.

- Patients with mental or neurologic conditions who are unwilling or incapable of following post operative care instructions.

- Foreign body sensitivity. Where material sensitivity is suspected, testing is to be completed prior to implantation of device.
JuggerLoc 2.9 mm
Soft Tissue Fixation with Needles

JuggerKnot all-suture bone anchor
2.9 mm drill hole

ZipLoop Technology allows for soft tissue to be easily cinched to bone, or into a socket
Needles allow for direct attachment of the tendon to the implant

Built upon the award winning JuggerKnot Soft Anchor Technology and strong fixation of ZipLoop Technology

Most Commonly Used
- Distal Biceps Reattachment
- Proximal Biceps Reattachment
- Ulnar Collateral Ligament Reconstruction
- Lateral Epicondylitis Repair
- Achilles tendon repair
JuggerLoc and ToggleLoc 2.9 mm
Soft Tissue Fixation Systems

**Most Commonly Used**
- Distal Biceps Reattachment
- Proximal Biceps Reattachment
- Ulnar Collateral Ligament Reconstruction
- Lateral Epicondylitis Repair
**JuggerLoc and ToggleLoc 2.9 mm**
Soft Tissue Fixation Systems

**JuggerLoc 2.9 mm**
Soft Tissue Fixation without Needles

- Built upon the award winning JuggerKnot Soft Anchor Technology and strong fixation of ZipLoop Technology
- ZipLoop Technology allows for soft tissues to be easily cinched to bone, or into a socket

**Most Commonly Used**
- Distal Biceps Reattachment
- Proximal Biceps Reattachment
- Ulnar Collateral Ligament Reconstruction
- Lateral Epicondylitis Repair
**ToggleLoc 2.9 mm**
Soft Tissue Fixation without Needles

- Strong, Knotless, ZipLoop technology
- Low profile 2.9 mm titanium button
- 2.9 mm drill hole

**Most Commonly Used**

- Distal Biceps Reattachment
- Proximal Biceps Reattachment
- Ulnar Collateral Ligament Reconstruction
- Lateral Epicondylitis Repair
JuggerLoc 2.9 mm
Soft Tissue Fixation Unicortical

Combination of 2.9 mm JuggerKnot and ZipLoop Technology

JuggerKnot all-suture bone anchor

2.9 mm drill hole

Most Commonly Used

- Distal Biceps Reattachment
- Proximal Biceps Reattachment
- Ulnar Collateral Ligament Reconstruction
- Lateral Epicondylitis Repair
- Achilles Tendon Repair
JuggerLoc 2.9 mm
Soft Tissue Fixation Pull Through

Most Commonly Used
• Distal Biceps Reattachment
• Ulnar Collateral Ligament Reconstruction
• Lateral Epicondylitis Repair
**JuggerLoc 2.3 mm**

Soft Tissue Fixation Pull Through without Needles

- Relay shuttle suture
- ZipLoop Technology allows for tendon to be easily cinched to bone, or into socket
- 2.3 mm drill hole
- Low profile, radio translucent JuggerKnot all suture bone anchor

**Most Commonly Used**

- Distal Biceps Reattachment
- Ulnar Collateral Ligament Reconstruction
- Lateral Epicondylitis Repair
Additional Instrumentation

2.3, 2.9, & 2.9 mm Short Guide Wires
(*2.9 mm Short Guide Wire is not shown)

5, 6, 7, & 8mm Slotted Reamers
(*6mm Slotted Reamer is not shown)
