

ALL-SUTURE ANCHORS ALL-INCLUSIVE P O R T F O L I O

2009

Biomet releases the 1.4 mm JuggerKnot® All-Suture Anchor, the first all-suture anchor on the market.

2011

JuggerKnot 1.4mm Short

2013

JuggerKnot launches in the Asia Pacific market. JuggerKnot 1.45mm Long

JuggerKnot launches in the EMEA market.

2010

JuggerKnot 2.9mm and JuggerKnot 1.0mm Mini

2012

THE LEADER IN ALL-SUTU

In 2009 Zimmer Biomet became the first company to introduce an all-suture anchor to the market with the launch of the JuggerKnot, revolutionizing soft tissue repair. Driven by a commitment to patient rehabilitation, Zimmer Biomet has expanded its portfolio into an array of devices to meet surgeon preferences.

2014

Cayenne Medical introduces the SureLock® anchor; Marking a new, mechanically deployed, all-suture option.

2019

Zimmer Biomet acquires Cayenne Medical, furthering the Zimmer Biomet Sports Medicine All-Suture Anchor product offerings.

RE ANCHOR INNOVATION

JUGGERKNOT 2.9 MM ALL-SUTURE ANCHORS

The JuggerKnot 2.9 mm Soft Anchor has multiple offerings and designs to accommodate surgeon preference in arthroscopic and mini-open procedures.

LOADED WITH MAXBRAID SUTURE

JuggerKnot 2.9mm Anchors are loaded with MaxBraid Suture. The JuggerKnot 2.9 mm Anchors with MaxBraid Sutures are offered double loaded with and without needles for arthroscopic and mini-open repairs.

LOADED WITH BROADBAND TAPE

The JuggerKnot 2.9 mm Anchors loaded with BroadBand Tape are offered in a variety of designs: double and triple loaded with sliding and non-sliding sutures. Offered with and without needles for arthroscopic and mini-open repairs.

Double and triple loaded with **sliding** sutures for knotted repairs.

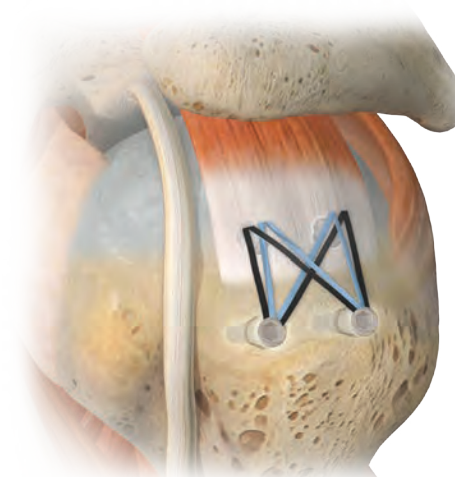

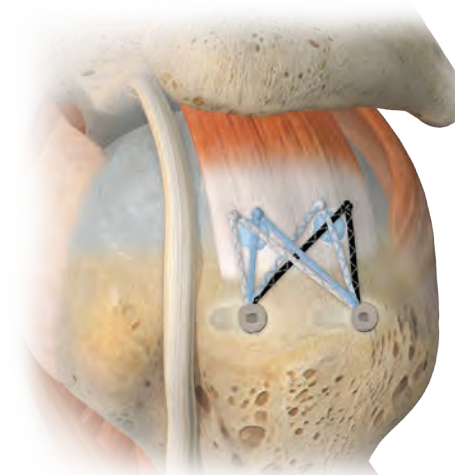

Double and triple loaded with **non-sliding** sutures for knotless repairs.

KNOTTED VS. KNOTLESS REPAIRS

Co-braided sutures are always sliding for arthroscopic knot tying. Solid suture colors are always non-sliding, or fixed in the anchor, designed for complete knotless repairs.

1.0 MM MINI

1.45 MM LONG

JUGGERKNOT 1.0 MM MINI AND 1.45 MM LONG ALL-SUTURE ANCHORS

The Juggerknot 1.0 mm Mini Anchor is currently the smallest all-suture anchor on the market and was designed for hand and wrist procedures. It is loaded with either a 2-0 or 3-0 MaxBraid Suture with T-28 tapered needles.

The Juggerknot 1.45 mm Long Soft Anchor is designed specifically for hip labral repair with an inserter 2.3 inches longer than the original 1.4 mm anchor to provide sufficient amount of working length in all areas of the hip labrum. It is offered single loaded with either a #1 or #2 MaxBraid Suture or a #2 (1.5 mm wide) BroadBand Tape.

JUGGERKNOTLESS 2.1 MM ALL-SUTURE ANCHOR

The 2.1 mm JuggerKnotless was the first all-suture knotless anchor on the market and was designed specifically for shoulder labral repair. It combines the innovation and clinical experience of the JuggerKnot All-Suture Anchor platform and the ZipLoop™ Technology.

The design of the implant eliminates the need for a surgeon to tie arthroscopic surgical knots. The locking mechanism is created in the design and technique itself and is pushed away from the articulating surface.

SURELOCK 1.4 mm AND 2.2 mm ALL-SUTURE ANCHORS

The SureLock All-Suture Anchor family was designed to achieve consistent anchor delivery with an inserter-controlled deployment method delivering the anchor below the bone cortex. The SureLock Anchor family provides versatility in this comprehensive all-suture anchor portfolio and allows for confidence in anchor fixation.

The 1.4 mm SureLock Anchor is single loaded with #2 MaxBraid Suture, while the 2.2 mm SureLock Anchor is double loaded with #2 MaxBraid Suture.
